

The background of the cover is a dark grey wall. On the left, a thin green plant stem with small leaves grows upwards. To the right, a window with white frames is visible, letting in bright light. Large, thick yellow concentric circles are overlaid on the image, with one set on the left and a larger set on the right. In the bottom right corner, there is a pattern of small yellow dots arranged in a grid-like fashion.

Five done-for-you automations you can
deploy in minutes.

THE AUTOMATION STARTER KIT: 5 Plug- and-Play Workflow Blueprints for Instant Recurring Income

THE AUTOMATION STARTER KIT

5 Plug-and-Play Workflow Blueprints for Instant Recurring Income

How to Use This Kit

These are **copy-and-paste workflow maps** designed so you can:

- ✓ Build small automations in minutes
- ✓ Sell them as monthly micro-services
- ✓ Customize them using simple ChatGPT prompts
- ✓ Implement them in Zapier, Make, or ANY automation tool you prefer

You're not getting pre-built automations you must import.

You're getting **the blueprint**, the logic, the triggers, the steps, and the prompts — which is what 90% of people actually need to start.

No tech overwhelm.

No setup headaches.

Just repeatable systems that anyone can build quickly.

AUTOMATION 1 — Lead Follow-Up Bot

Goal: Reply instantly to new leads so you never lose opportunities.

Use Case: Local businesses, coaches, freelancers, content creators.

Trigger:

A new form submission (Tally, Typeform, Notion, Google Forms)

Actions:

1. Send an instant personalized email using a dynamic template
2. Log the lead in Google Sheets
3. Notify yourself via email or DM
4. Send a scheduling link (optional)

ChatGPT Prompt Template:

"Write a friendly instant-response email for a new lead who filled out my **[form type]** about **[offer]**. Tone: warm, clear, helpful."

Why It Sells:

Businesses will pay monthly for automated responsiveness.

AUTOMATION 2 — Invoice Tracker

Goal: Track payments automatically and stay organized.

Use Case: Anyone selling digital products or services.

Trigger:

A new payment from Gumroad, Stripe, PayPal, or Etsy

Actions:

1. Log each sale into Google Sheets
2. Create/update a customer record
3. Add tags to your email tool (Beehiiv, ConvertKit)
4. Send yourself a clean weekly summary (optional)

ChatGPT Prompt Template:

“Generate a weekly summary message listing all new sales, total revenue, and top products.”

Why It Sells:

People pay for clarity — especially creators with messy back ends.

AUTOMATION 3 — Social Scheduler

Goal: Publish consistent content without manually posting.

Use Case: Content creators, agencies, brands, freelancers.

Trigger:

A new item added to a Notion or Google Sheets content calendar

Actions:

1. Generate captions using AI
2. Add branding hashtags
3. Schedule the post via a scheduling tool
4. Log performance (optional)

ChatGPT Prompt Template:

“Turn this rough idea into a polished social caption with a strong hook and a clear CTA: **[paste rough idea]**.”

Why It Sells:

This is the #1 automation small creators outsource.

AUTOMATION 4 — Client Onboarding Flow

Goal: Start new clients automatically and professionally.

Use Case: Agencies, freelancers, consultants.

Trigger:

A client submits a payment or booking

Actions:

1. Send welcome email
2. Deliver onboarding form
3. Add client to CRM sheet
4. Create a folder structure (optional)
5. Send internal notification

ChatGPT Prompt Template:

“Write a warm onboarding email for a new client who purchased **[service]**. Include next steps and expectations.”

Why It Sells:

Clients LOVE smooth onboarding — and businesses pay for it.

AUTOMATION 5 — Weekly Recap Digest

Goal: Replace manual weekly reporting with autopilot summaries.

Use Case: Agencies, creators, coaches, client-based businesses.

Trigger:

Every Friday at a set time

Actions:

1. Pull data from Sheets, forms, or CRM
2. Summarize using ChatGPT
3. Send recap to you or clients
4. Save weekly logs to a folder

ChatGPT Prompt Template:

“Summarize this week’s activity into a clean, professional recap:

- top leads
 - follow-ups
 - outcomes
 - next steps
- [paste data]”**

Why It Sells:

This one workflow alone can justify a \$99–\$249/month retainer.

Want help turning these prompts into real income?

The *AI Income Blueprint* gives you:

- 7 weekend-built income systems
- templates, automations & workflows
- step-by-step execution guides
